Amy,

Mid-America Steel Drum has provided everything requested by EPA. Based on the information provided I do not expect any additional actions at this time. Unfortunately, EPA does not issue letters stating that a facility is in compliance or that an investigation is complete. As this is EPA's policy, there is nothing more I can provide to you regarding your concerns below.

Hi Dakota,

I am following up our conversation in early July, and the voice mail I left on July 18th. Again, do you have any more information on if EPA can send out something (anything) to show that MASD Oak Creek met all the requests from the March 5, 2014 letter or that MASD Oak Creek is in compliance or...

Again, the request is due to a large potential client of theirs that want to make sure there are no outstanding environmental compliance issues (specifically your letter) before giving them business.

Thanks, Amy

Subject: Mid-America Steel Drum Stack Test Report Arrival

Good Afternoon Dakota, Michael, Ryan, Amy & Scott -

The report for the Mid-America Steel Drum (MASD) has been completed and a hard copy will be sent this afternoon to the US EPA Region 5 office. At the request of Scott Swosinski (MASD) and Amy Litscher (their consultant), I have been asked to send each of you an electronic copy of the report as well. You should be looking for an email with those files.

I am writing this note to warn you that the two "pdf" files (one containing the report body and one containing the associated appendices) will be sizable - about 18MB in total. Some agencies and/or companies have size limitations on their email inbox and may filter out such a large submittal. If you do not receive the email later today, please contact me so that I can ensure your receipt of this information.
